

Campus System

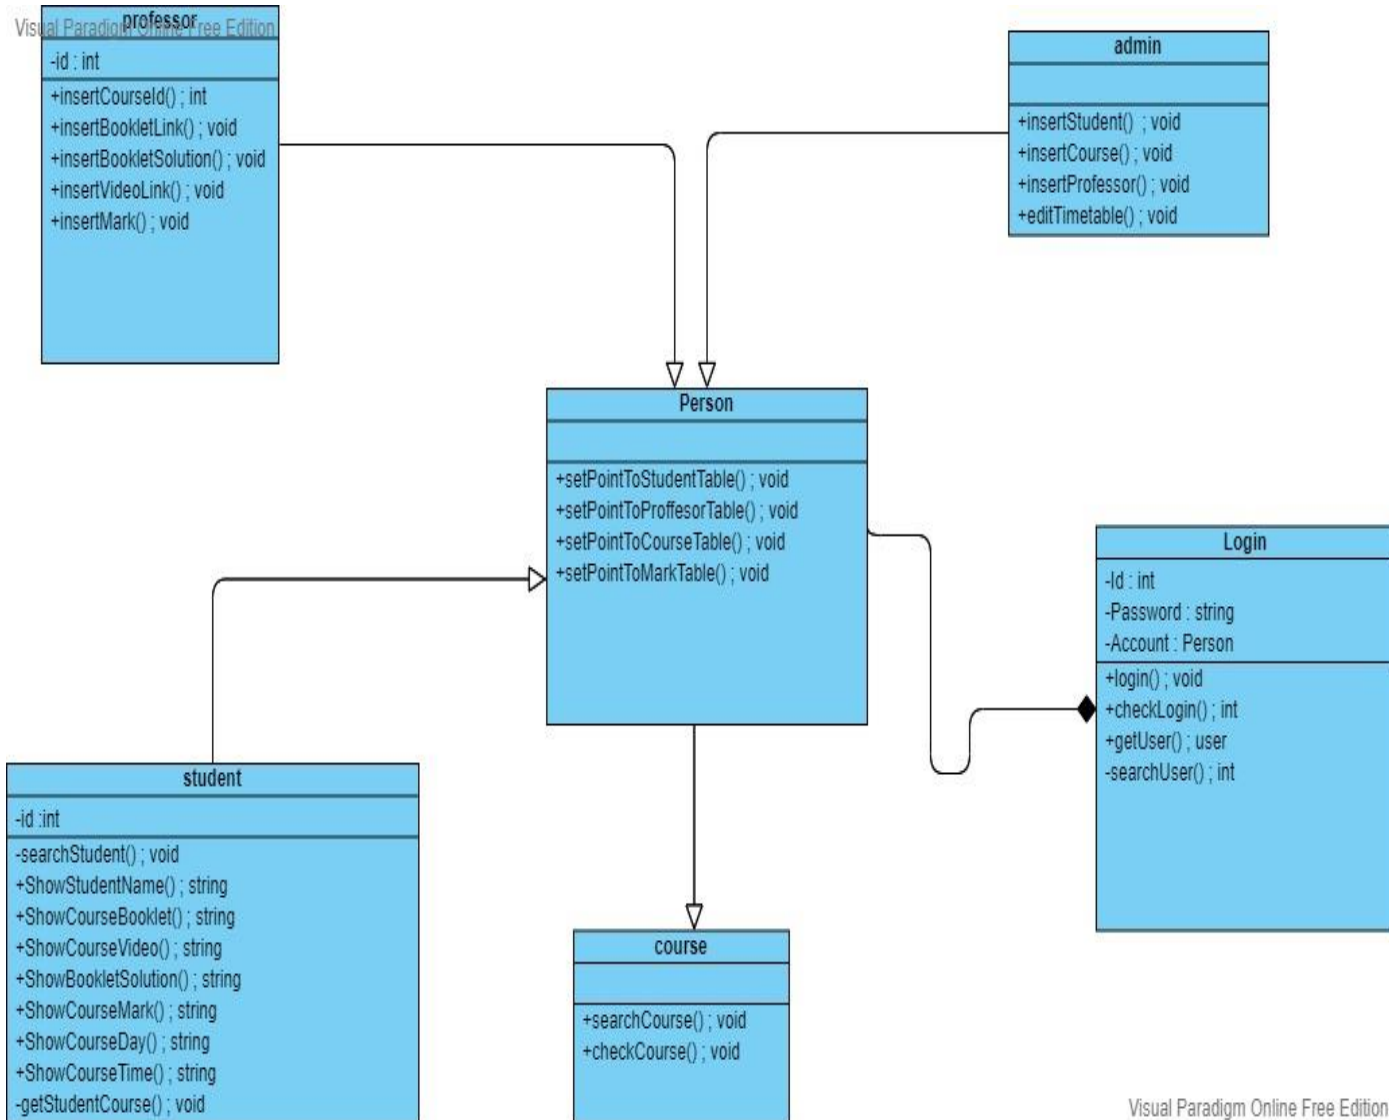

short description:

It is a campus system that the admin, the professor, and the student use to interact with each other, and the professor and student data can be modified (such as: the course, the course date...) or adding new professor data by the admin, and the professor can set an appointment for all students to attend their course and determine their exam scores and display them by The System.

-Introduction :

it is used to utilize the assets that will assist the understudy with acquiring all the data that a Student needs from the gateway as reports and easy to utilize. The Admin is capable to add an understudy, course and in like manner update the characteristics of the understudy in light of week after week Test . The secret word is produced by the System which will be shipped off the understudies mail Id. The Admin adds the Booklets and Test Solutions for example pdf that can help the understudy. The Admin adds the Timetable and the Schedule which are pictures. The Admin likewise add the Video Links to help the understudy for references. The Marks are essentially the Graphical Reports utilizing the Line, Bar and Pie Charts. The Student logs in to the application with his certifications and utilizes the entry and gets whatever is accessible. The App makes it exceptionally simple to utilize and simplifies it to explore between various things on gateway. The Student can see plan, plans and can watch video joins for references. For facilitate the work there are booklets and test arrangements will can be seen and downloaded.
